## Contents

### Fundamentals of Joining

**Fundamentals of Welding**
Chairperson: Thomas W. Eager, Massachusetts Institute of Technology

- Energy Sources Used for Fusion Welding
- Heat Flow in Fusion Welding
- Fluid Flow Phenomena During Welding
- Transfer of Heat and Mass to the Base Metal in Gas-Metal Arc Welding
- Arc Physics of Gas-Tungsten Arc Welding
- Power Sources
- Fundamentals of Weld Solidification
- Nature and Behavior of Flaws Used for Welding
- Shielding Gases
- Solid-State Transformations in Weldments
- Cooling Phenomena Associated With Welding
- Characterization of Welds

### Fundamentals of Brazing and Soldering

Chairperson: Mel M. Schwartz, Sikorsky Aircraft

- Introduction to Brazing and Soldering
- Fundamentals of Brazing
- Fundamentals of Soldering

### Fundamentals of Solid-State Welding

Chairperson: Ray Eylon, Los Alamos National Laboratory

- Introduction to Solid-State Welding
- Fundamentals of Metal and Metal-to-Ceramic Adhesion
- Fundamentals of Friction Welding
- Fundamentals of Diffusion Bonding
- Fundamentals of Explosive Welding
- Mechanical Properties of Soft-Interface Solid-State Welds

### Joining Processes

**Fusion Welding Processes**
Chairperson: Howard Cary, Hobart Brothers Company

- Shielded Metal Arc Welding
- Gas-Metal Arc Welding
- Flex-Core Arc Welding
- Gas-Tungsten Arc Welding
- Plasma Arc Welding
- Carbon Arc Welding
- Submerged Arc Welding
- Stud Arc Welding
- Capacitor Discharge Stud Welding
- Plasma MIG Welding
- Resistance Spot Welding
- Projection Welding
- Resistance Seam Welding
- Pinch Welding
- U-Shaped Welding
- High-Frequency Welding
- Electromagnetic Welding
- Laser-Beam Welding
- Electrosol, Electroslag, and Electro-Slag Welding
- Coiled Gas Welding

**Thermite Welding**

**Solid-State Welding, Brazing, and Soldering Processes**
Chairperson: Randy Reper, EG&G Rocky Flats

- **Solid-State Welding Processes**
  - High-Temperature Solid-State Welding
  - Low-Temperature Solid-State Welding
  - Explosive Welding
  - Forge Welding
  - Cold Welding
  - Connection Welding
  - Rod Welding
  - Friction Welding
  - Radial Friction Welding
  - Friction Surfacing
  - Ultrafine Welding

- **Brazing Processes**
  - Torch Brazing
  - Furnace Brazing
  - Inductive Brazing
  - Dip Brazing
  - Resistance Brazing
  - Infiltration Brazing
  - Infiltration Brazing
  - Brazing With Clay Brazing Materials

- **Soldering Processes**
  - Iron Soldering
  - Torch Soldering
  - Furnace and Infrared Soldering
  - Dip Soldering
  - Resistance Soldering
  - Laser Soldering
  - Hot Gas Soldering
  - Induction Soldering
  - Wave Soldering
  - Vapor-Phase Soldering

### Materials Selection for Jointed Assemblies

**Material Requirements for Service Conditions**
Chairperson: R. Orisai Thomas, Jr.

**Material Requirements for Service Conditions**

- Selection of Carbon and Low-Alloy Steels
  - Carbon Steel
  - Low-Alloy Steel
  - Inclusions of Welding on Steel Weldments Soundness
  - Influence of Welding on Steel Weldment Properties

- Selection of Stainless Steels
  - Stainless Steel
  - Inclusions of Welding on Steel Weldments Soundness
  - Influence of Welding on Steel Weldment Properties

- **Properties**

- Property of John U. Tomlinson Library
- Mesa State College
- Grand Junction, CO 81501
